

Comfort™ Series Packaged Air Conditioners and Packaged Heat Pumps

Compact, durable packaged products with your comfort in mind

50ZPC, 50ZHC

What You Can Expect From Carrier

Innovation, efficiency, quality: the Carrier® Comfort™ Series 50ZPC packaged air conditioner and 50ZHC packaged heat pump represent years of research and design with one goal in mind – making your family comfortable. Offering lasting durability and energy-saving performance, these units represent the Carrier quality, environmental stewardship and lasting durability that have endured for more than a century. Regardless of your need – packaged air conditioner or packaged heat pump – both of these models boast a compact footprint and flush-to-the-wall installation, making them the perfect fit for areas where space is at a premium.

Efficiency

SEER (Seasonal Energy Efficient Ratio) and HSPF (Heating Seasonal Performance Factor) ratings are like your car's MPG – the higher the number, the greater the potential for savings. The Comfort™ Series 50ZPC packaged air conditioner and 50ZHC packaged heat pump offer 14.0 SEER cooling, while the 50ZHC also delivers 8.0 HSPF heating.

Durability

50ZPC and 50ZHC packaged products are built for years of lasting durability with a galvanized steel cabinet and louvered coil guard. And, our exclusive high-tech composite, rust-proof base with integrated, sloped drain pan design improves drainage and helps inhibit mold, algae and bacterial growth.

Environment

Carrier was the first to offer systems with Puron® refrigerant, which does not contribute to ozone depletion. By replacing an older, less efficient packaged product with the 50ZPC or 50ZHC, you are reducing energy use and your environmental impact.

Versatility

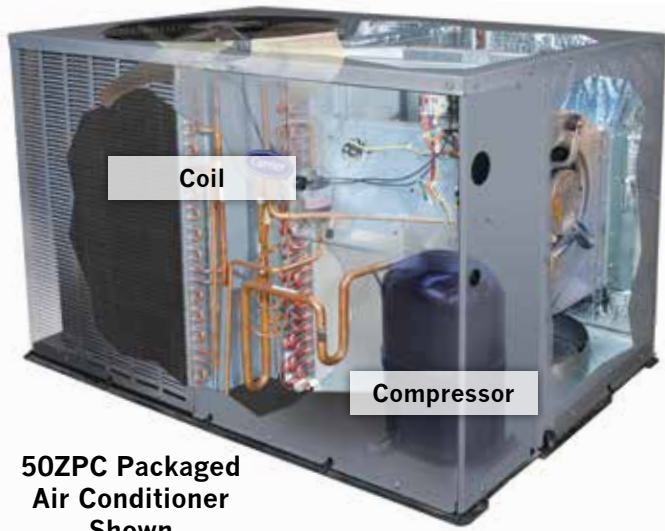

Our lightest, most compact packaged products, the 32-inch narrow 50ZPC or 50ZHC is the logical choice for zero lot line communities, manufactured housing, or anywhere space is limited.

Limited Warranty

To the original owner, the Carrier® Comfort™ Series 50ZPC packaged air conditioner and 50ZHC packaged heat pump are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty period. See warranty certificate at carrier.com for complete details and restrictions.

The Carrier® Difference

If you could look under the hood of our 50ZPC and 50ZHC models, you'd see what drives the efficient, reliable comfort: a serious commitment to quality. Our microtube coil technology saves space and provides lasting comfort with its corrosion-resistant construction. The control board ensures reliable communication with your thermostat for accurate heating and cooling comfort. And, our smooth-running compressor represents the solid, reliable performance you expect.

The 50ZPC packaged air conditioner and 50ZHC packaged heat pump are built to look their best while enduring exposure to hail, errant soccer balls, lawn equipment and more.

Turn to the Experts

When it comes to your comfort, you don't want to take chances. That's why so many before you have turned to the experts at Carrier for indoor comfort innovation and reliability. When you choose Carrier, you can be confident that your new system is designed, built and backed by the world's foremost comfort innovator. In addition, Carrier products undergo one of the most rigorous quality control regimens in the industry. From performance and quality testing during product development to our 100% run testing during production, we don't miss an opportunity to meet the toughest requirements of all: yours.

50ZPC, 50ZHC

The Total Indoor Comfort System

Your Carrier® dealer will recommend a system that is best suited to meet your home-comfort needs and local weather environment:

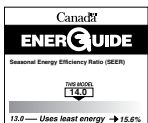

1. **Packaged Air Conditioners and Packaged Heat Pumps** provide reliable, high-efficiency cooling for long-lasting comfort and energy savings. Packaged heat pumps also offer high-efficiency heating.
2. **Wi-Fi® Thermostat** offers precise, programmable comfort from your web-connected device.
3. **Zoning** sets different temperatures for up to three different areas of your home for truly customized comfort and enhanced utility savings.
4. **Air Cleaner** improves air quality by removing harmful and irritating airborne pollutants from your home.
5. **Humidifier** replenishes moisture to dry air.
6. **Ventilator** combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency – great for today's tightly constructed home.

More Than a Century of Cool

In 1902, a determined engineer answered one of mankind's most nagging questions: How do we make hot, sticky, indoor air go away? In creating the world's first modern air conditioning system, Willis Carrier forever changed indoor life, and, more than a century later, the corporation that bears his name takes inspiration from his example.

Carrier strives to improve on our founder's breakthroughs, introducing new technologies that make life at home even cooler. Today, our nationwide network of experts continues to advance Willis Carrier's lifework. Your expert Carrier® dealer is equipped to evaluate your home and create a customized system designed around your lifestyle.
